WARNING

ACUTE NITRATE NOTICE

DO NOT GIVE WATER TO INFANTS UNDER 6 MONTHS OF AGE

The _____ water system has a high level of Nitrate which was found in the water system from samples collected on:

Infants below the age of 6 months who drink water containing Nitrate in excess of the maximum contaminant level could become seriously ill and, if untreated may die. Symptoms include shortness of breath and blue baby syndrome. If symptoms occur, seek medical attention immediately.

Water, juice and formula for children under 6 months of age should NOT be prepared with this tap water. Bottled water or other water low in Nitrates should be used for infants until further notice.

DO NOT BOIL THE WATER

➔ Boiling, freezing, filtering or letting water stand does NOT reduce the Nitrate level.

Adults and children older than 6 months can drink the tap water. However if you are pregnant or have specific concerns, please contact your health care professional.
